## Security Sealing Devices

Petroleum Testing Equipment suppliers  
worldwide since 1930

To set the standard for  
**MANUFACTURING QUALITY** and  
customer service in the **PETROLEUM  
TESTING** industry.

NOW OPERATING MILLER-WEBER OF TEXAS

## General Information

---

L-K Industries manufactures and supplies security sealing devices at its Houston facility. Security sealing mechanisms provide evidence of theft or tampering of valves, piping junctions and other devices, and limit access to vulnerable points such as lock nuts and needle valve handles. Security sealing does not prevent fraud or theft; however, having security seals in place facilitates compliance with OOC (Offshore Operators Committee) Best Practices and BSEE (Bureau of Safety and Environmental Enforcement) requirements.

Please call 713-926-2623 to place an order, or the order form may be found at [www.lk-ind.com](http://www.lk-ind.com). Refer to the current Security Sealing Devices Price List for pricing.

## Security Sealing Devices

### Needle Valve Handle Sealing Device

This sealing device covers the handle of any needle valve.

P/N	Valve Size
SP-NV01	3/8" - 2"
SP-NV02	> 2"

### Tubing Nut Sealing Device

These sealing devices come in assorted sizes and are designed specifically to fit Swagelok® tubing nuts. Each size may fit tubing nuts made by other manufacturers and may be used for assorted fittings.

P/N	Nut Size
SP-TN01	1/4"
SP-TN02	3/8"
SP-TN03	1/2"

### Pipe Union Sealing Device

The pipe union sealing device is designed to cover the entire pipe union. It comes in multiple hole sizes (bored through both sides) to accommodate each pipe union. The device sizes are based on Class 3000 unions. Ensure the hole size on the device matches the union collar size.

P/N	Pipe Size	Hole Size*
SP-PU01	1/2"	1-3/16"
SP-PU02	3/4"	1-15/32"
SP-PU03	1"	1-25/32"
SP-PU04	1 1/2"	2-35/64"
SP-PU05	2"	3-1/16"

\* Approximate Hole size

## Security Sealing Devices

### Sealing Device (3/4" Sched 40 PVC Pipe)

This multipurpose sealing device comes in 1' long Schedule 40 PVC pipe sections and has 1/8" diameter holes drilled through, every 1/2". It can be cut into the desired fitting size with pipe cutters.

P/N	Hole Size*
SP-LK01	1/8"

\* Approximate Hole size

### Sight Glass Packing Sealing Device (2" Sched 40 PVC Pipe)

These devices cover the top and bottom of a sight glass, such that the sight glass may not be removed. Each edge of the sealing device has four 1/8" diameter holes. These devices should be purchased together, along with the Sight Glass Valve Packing Nut Sealing Device (SP-LK04). Replacement devices can be ordered individually.

P/N	Device Size
SP-LK02	Lower, 2 1/2"
SP-LK03	Upper, 3"

### Sight Glass Valve Packing Nut Sealing Device (PVC End Cap)

This device is designed to seal packing nuts on sight glass valves. There is a 5/8" hole on the top of the device with four 1/8" holes around the bottom edge. This device should be purchased along with the Sight Glass Packing Sealing Devices ( SP-LK02 and SP-LK03). Replacement devices can be ordered individually.

P/N	Hole Size*
SP-LK04	5/8" top, 1/8" side

\* Approximate Hole size

## Security Sealing Devices

### Hex Head Bolt/Nut Sealing Device

These nut retainers are designed to fit snugly around a bolt or nut, and prevent it from being loosened.

P/N	Nut Size
SP-LK05	1/4"
SP-LK06	5/16"
SP-LK07	3/8"
SP-LK08	7/16"

### Rosemount Transmitter Cover Sealing Device (for 3144P Temperature Transmitter)

This device is designed to cover the Rosemount 3144P Temperature Transmitter. It is available in plastic or aluminum.

P/N	Material
SP-RT01	Aluminum
SP-RT03	Plastic

### Rosemount Transmitter Cover Sealing Device (for 3051S Pressure Transmitter)

This aluminum device is designed to cover the Rosemount 3051S Pressure Transmitter.

P/N	Material
SP-RT02	Aluminum

### Solenoid Vent Sealing Device

The solenoid vent has a 1/8" perforation to prevent loosening or removal.

P/N	Hole Size*
SP-SV01	1/8"

\* Approximate Hole size

## Security Sealing Devices

### Drilled SS Plug Sealing Device

The stainless steel drilled plug has a 1/8" perforation to prevent loosening or removal.

P/N	Plug Size
SP-DP01	1/4"
SP-DP02	1/2"

### Drilled Head Bolt

The drilled head bolt has a 1/8" perforation to prevent loosening or removal. The bolts are made to order; the customer must specify the head type, size, length and grade.

P/N	Size
SP-DB01	Various

### LBY Cover Sealing Device

The LBY cover sealing device prevents the loosening or opening of LBY elbows. It comes in multiple hole sizes (bored on one side) to accommodate the LBY elbow.

P/N	Pipe Size	Hole Size*
SP-LB01	1/2"	1-5/8"
SP-LB02	3/4"	2"
SP-LB03	1"	2-1/4"

\* Approximate Hole size

L-K Industries takes great pride in building high quality petroleum equipment and providing excellent customer service. In addition to security sealing devices, L-K Industries offers oil centrifuges, sample heaters, gauging accessories, and glassware such as centrifuge tubes, thermometers and hydrometers.
